

OMAIR MALIC

Python Expert &
Fullstack Web Developer

CONTACT

- omairmalic28@gmail.com
- Philippines (Remote)

CORE EXPERTISE

TECH STACK

Scraping: Scrapy, Selenium, Playwright, BeautifulSoup, HTTPX
Backend: FastAPI, Django, Flask, REST APIs
Frontend: React, Next.js, TypeScript
Database: PostgreSQL, MongoDB, Redis
DevOps: Docker, AWS, Git, Linux

PROFESSIONAL SUMMARY

Specialized Python developer focused on web scraping, data extraction, and automation solutions. I build robust systems that handle complex anti-bot measures, process millions of data points, and deliver reliable results. My solutions help businesses gain competitive intelligence, automate repetitive tasks, and scale their data operations efficiently.

EDUCATION

Bachelor of Science in Information Technology 2023 – 2024
ICCT Colleges Main Campus *Cainta, Rizal, Philippines*

WHAT I DELIVER

- High-Volume Data Extraction**
Scraping systems processing 500K+ pages daily with 99%+ accuracy
- Anti-Detection Solutions**
Bypass Cloudflare, DataDome, PerimeterX with stealth techniques
- Automated Monitoring**
Real-time price tracking, inventory alerts, competitor analysis
- Custom API Development**
FastAPI backends to serve and manage scraped data
- CAPTCHA Solving**
Automated solutions for reCAPTCHA, hCaptcha, Turnstile

EXPERIENCE

- Python Developer & Automation Specialist** Mar 2024 - Present
Freelance | Remote - Working with clients globally
 - Built 50+ custom scraping solutions for e-commerce, real estate, and finance sectors
 - Developed anti-detection systems with proxy rotation, fingerprint spoofing, CAPTCHA bypass
 - Created data pipelines processing millions of records with automated error recovery
 - Delivered FastAPI backends for real-time data access and webhook integrations
 - Worked with clients from US, Australia, Canada, Singapore, and Europe

FEATURED PROJECTS

- Enterprise Scraping System V3** Oct 2025 - Present
Large-scale infrastructure handling 500K+ daily extractions across 100+ e-commerce sites with automatic failover and retry logic.
- E-commerce Price Intelligence** Aug 2025 - Present
Real-time competitor price monitoring with instant alerts, historical tracking, and trend analysis dashboard.
- Amazon Analytics Platform** Mar 2024 - Jul 2025
Keepa API integration processing 10K+ ASINs daily for price history, sales rank tracking, and buy recommendations.
- Stealth Browser Framework** Mar 2024 - Aug 2024
CDP-based automation with fingerprint randomization, successfully bypassing major protection services.

Ready to automate your data collection?
